About IES

The International Eosinophil Society (IES) is the world’s leading member-driven organization committed to advancing research on the eosinophil—an inflammatory cell type strongly linked to numerous diseases. IES is a not-for-profit organization which serves scientists, clinicians, academicians and industry leaders from around the world. By promoting scientific exchange and collaboration through educational programs, the IES strives to enhance the outcomes and well-being of patients affected by eosinophil-related diseases worldwide.

Leadership

Board of Directors

President: Marc Rothenberg, MD PhD (USA)

President-Elect: Allison Fryer, PhD (USA)

Immediate Past-President: Florence Roufosse, MD PhD (Belgium)

Secretary-Treasurer: Lisa Spencer, PhD (USA)

Matthew Drake, MD (USA)

Elizabeth Jacobsen, PhD (USA)

Jean-Emmanuel Kahn, MD, PhD (France)

Fei Li Kuang, MD PhD (USA)

Amy Klion, MD (USA)

Rossana Melo, PhD (Brazil)

Manali Mukherjee, PhD (Canada)

Michael Wechsler, MD MMSc (USA)

Yoshiyuki Yamada, MD PhD (Japan)

Nives Zimmermann, MD (USA)

Trainee Member

Eva Knuplež, PhD (Slovenia)

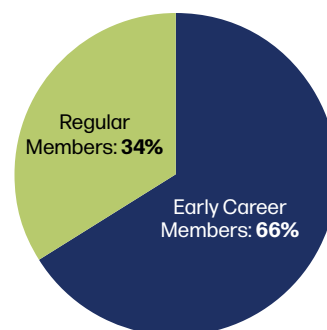

Membership

Beginning in July of 2023, IES extended complimentary membership to all early career individuals. Recognizing the significance of fostering opportunities, IES is committed to actively involving Early Career Members to advance research in the realms of eosinophil biology and the pathogenesis of eosinophil-associated allergic, respiratory, gastrointestinal and other diseases.

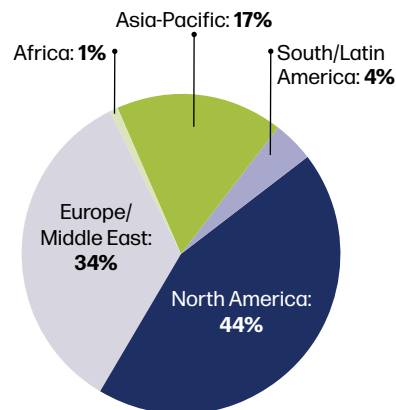

Areas of Research and Medical Specialties Represented by IES Members

- Allergic Rhinitis
- Atopic Dermatitis
- Autoimmune/inflammatory Diseases
- Cancer
- Drug Hypersensitivity Reactions
- Eosinophilic Asthma
- Eosinophilic Gastrointestinal Diseases (EGID)
- Eosinophilic Granulomatosis with Polyangiitis (EGPA)
- Eosinophilic Gastroenteritis
- Eosinophilic Leukemia
- Eosinophilic Pneumonia
- Hypereosinophilic Syndrome (HES)
- Parasitic Infections

IES Membership by Type

IES Membership by Region

Strategic Goals of the International Eosinophil Society

International Collaboration

Promote global collaboration in eosinophil-related research, treatment, and awareness. Facilitate networking among professionals to encourage the exchange of ideas.

Educational Events

Organize virtual and in-person events that bring together experts, researchers, and stakeholders to share knowledge and advancements in the field.

Educational Resources

Provide educational resources to increase awareness and knowledge about eosinophil-related diseases among healthcare professionals, researchers and the general public.

Early Career Support

Support early career individuals through initiatives such as complimentary membership, mentorship programs and educational opportunities to foster the next generation of researchers in eosinophil biology.

Expand and Diversify Membership

Actively work to broaden and diversify the membership base to include individuals from various backgrounds, geographic regions, and disciplines, fostering a more inclusive and comprehensive community.

Advance Research

Promote and support scientific research in the field of eosinophil biology and related areas to enhance understanding and develop new treatments.

Global Initiatives

Meetings & Events

Biennial Symposium

The IES proudly hosts the preeminent international gathering dedicated exclusively to the exchange of research and ideas centered on the eosinophil.

- **2023 IES Symposium in Hamilton, ON, Canada**

Highlights:

- Highest attendance on record
- Record number of invited speakers and sessions
- 100% of attendees rated the meeting positively, stating they would attend future IES events

- **Save the Date: 2025 IES Symposium in Montpellier, France, from 7-11 July 2025**

- Plan to participate in this premier event and remain at the forefront of eosinophil research.

Webinars

The IES Monthly Webinar Series, attracting an attendance of 100 - 500 participants, offers a dynamic platform for ongoing education, fostering discussions, and promoting collaboration among experts in the field of eosinophil research.

Recent Webinar Topics Include:

- Neuroimmunology in Eosinophils
- Mast Cells & Eosinophils
- Cross-evolutionary and Cross-species Eosinophils
- Upper Airway Disease: Eosinophils and Pathogenesis
- Predictors for Biologics in Eosinophilic Diseases

2023 Symposium Poster Session - Hamilton, Ontario, Canada

Travel Grant Awardees at the 2023 Symposium in Hamilton, Ontario, Canada

Global Initiatives

Education

Website (www.eosinophil-society.org):

The current IES website is a source for cutting-edge resources and global initiatives in eosinophil research. Stay tuned for the 2024 relaunch, promising an enhanced platform designed to elevate the experience, featuring enriched content, user-friendly navigation, and innovative tools for seamless engagement. See page 5 for more details!

- **New Feature in 2023 - Medical Journal Reviews**
IES selects articles on a monthly basis for their importance to scientists and clinicians interested in the eosinophil. These selected publications are then reviewed by early career individuals, providing valuable insights and perspectives.

Journal of Leukocyte Biology (JLB) Special Focus Issue

Set for release in August 2024 is an exciting special focus issue in The Journal of Leukocyte Biology (JLB), featuring articles related to the themes of the 2023 Biennial Symposium of the International Eosinophil Society (IES).

Early Career Programs

Mentorship Program – launching in 2024!

The IES Mentorship Program is a transformative initiative designed to provide early career professionals in eosinophil research with invaluable guidance and support from seasoned mentors, fostering growth, collaboration, and excellence in the field.

Networking Events

Networking events specifically for early career individuals are planned during upcoming related international congresses. These events will provide a forum, outside the IES Biennial Symposium, for those involved in eosinophil research to connect, collaborate, and build meaningful relationships within the global community, providing invaluable opportunities for mentorship, knowledge exchange and career development.

Membership Expansion – New in 2023!

The IES is actively working to broaden and diversify the membership base to include individuals from various backgrounds, geographic regions, and disciplines. IES recently started offering free membership to early career individuals, joint membership fees with related organizations, complimentary membership for medical professionals in Africa, and reduced or waived fees for those facing financial hardship. This initiative aims to create a diverse and accessible community dedicated to advancing the field of eosinophil research globally.

Mark Larche, Scientific Program Chair, with Alessandra Gurtner and Annalise M. Psaila, Best Oral Abstract Awardees at the 2023 Symposium.

Announcing the IES Website Relaunch in 2024!

The International Eosinophil Society (IES) is excited to announce the relaunch and expansion of our website, bringing you closer to an abundance of knowledge in eosinophil biology and related fields.

★ What's to Come?

- **Cutting-Edge Design:** Experience a modern and user-friendly interface designed for effortless navigation and enhanced accessibility.
- **Expanded Resources:** Access an enriched repository of educational materials, research publications, and guidelines, deepening your understanding of eosinophil-related diseases.
- **Global Initiatives Hub:** Stay tuned for updates on our global collaborations and international events shaping the future of eosinophil research. Join a future-ready community of professionals globally, contributing to the evolving landscape of eosinophil research.

🔍 Anticipate Key Features

- **Biennial Symposium Preview:** Get a sneak peek into our upcoming 2025 Biennial Symposium, a global forum where experts propel eosinophil research forward.
- **Webinar Series Teasers:** Anticipate dynamic discussions through our future monthly webinar series, connecting you with thought leaders in the field.
- **Advertising Opportunities for Companies:** Maximize your reach by exploring advertising opportunities tailored for companies seeking visibility within the eosinophil research community.
- **Video Library:** View a growing resource of key webinars and eosinophil related information.

📖 Educational Excellence

- **Medical Journal Reviews:** Stay ahead with reviews of pertinent medical journals, keeping you at the forefront of eosinophil research.
- **Member Publications:** Explore valuable insights published by our members, offering diverse perspectives and advancements in the field of eosinophil research.

🔑 Early Career Support

- **Mentorship Program:** Unlock upcoming opportunities for mentorship and professional growth through our dedicated early career support initiatives.
- **Job Board:** Explore exciting career opportunities through our dedicated Job Board, connecting academia and industry in the field of eosinophil research.

🔗 **Stay Connected:** Follow us on social media for real-time updates, events and discussions:

- Facebook: @InternationalEosinophilSociety
- Twitter: @EosinophilSoc
- Instagram: @eosinophilsociety

Dive into the future of eosinophils with IES—where knowledge meets future global collaboration!

Ways to Support Our Mission

The International Eosinophil Society (IES) provides Sponsors with two main opportunities to support our mission – through yearly membership to the IES Corporate Advisory Council and through sponsoring our in-person biennial Symposium. More information on 2025 Biennial Symposium sponsorship opportunities will be available in the second half of 2024. Membership to the Corporate Advisory Council does not automatically include Symposium sponsorship.

Corporate Advisory Council Membership

Overview

The International Eosinophil Society invites corporate partners to join the Corporate Advisory Council, providing an opportunity for collaboration. IES understands that businesses play an important role in furthering IES's mission and improving the health of countless patients throughout the world and this council allows both IES and corporate representatives to work closely together to accomplish this goal.

IES's Corporate Advisory Council is a body that unites IES and corporate partners to discuss the profession and industry as a cohesive unit advancing science and improving the lives of patients. Council meetings will provide industry representatives the opportunity to communicate with IES leadership and key opinion leaders to discuss topics of interest. These meetings may also include representatives from IES's vast international network, which includes allergists and clinical immunologists across dozens of countries in North America, South America, Europe, Asia-Pacific, the Middle East, and Africa.

Mandate

The Corporate Advisory Council is a joint IES-corporate strategic partnership with the vision of advancing research, knowledge, and education to physicians in the field of allergy and clinical immunology, specifically related to the eosinophil and eosinophilic disorders. By creating an open dialogue and sharing expertise, Corporate Advisory Council members and IES leadership will explore collaborative opportunities to improve patient care and advance the mission of the IES throughout the world.

Membership

- Membership is open to any entity in the field of allergy/immunology, including those who develop the pharmaceuticals, medical devices, and other needed medical items and services to treat patients.
- Membership is for a 1-year term, beginning on the date the contract is executed.

Benefits

	Platinum \$50,000	Gold \$25,000	Silver \$10,000	Bronze \$5,000
Dedicated posting on the IES website, social media outlets and a broadcast email advertising company's clinical trials.	■			
Online webinar sponsorship on topic of Sponsor's choosing (content developed by IES)	■	■		
Inclusion of your company logo on the IES website	■	■	■	■
Representative(s) at the Corporate Advisory Council Meeting*	4	3	2	1
One hour call with IES leadership	■	■	■	■

*This meeting will take place during the AAAAI Annual Meeting in 2024 and during the 13th Biennial Symposium of the IES in 2025

Corporate Council Advisory Members

- Allakos
- Amgen
- Areteia Therapeutics
- AstraZeneca
- Bristol Myers Squibb
- Celldex Therapeutics
- GSK
- Regeneron
- Takeda

Guidelines for Support

Supporting an IES event or educational activity not only offers a more rewarding experience for attendees, but also maximizes your company's visibility. Support is not limited to these suggestions; IES encourages new and creative ideas that contribute to the quality of our meetings and education.

IES Logo Use

Only supporters of official IES programs will be allowed to use the IES name and logo in the promotion and marketing of their grant or sponsorship. All such usage must first be approved by IES. The use of the IES name and logo will be permitted to show the appropriate affiliation the supporter has with the program.

Management of Grants

The ultimate decision regarding the management of Grants, including the receipt and disbursement of funds, is the responsibility of IES. Grants from supporters will be paid directly to IES. Both the Supporter and IES will conform to the terms of the letter of agreement they sign.

It is customary for IES to use Grant funds for the planning, production, dissemination, and promotion of IES educational programs. Grants may support administrative, rental, marketing, mailing and all other associated activity planning, development, and implementation costs.

Letter of Agreement

All partners will be required to sign a Letter of Agreement with IES, outlining grant or sponsorship prerequisites and conditions. Companies interested in supporting IES initiatives should contact Katie Komassa, IES Executive Director at kkomassa@eosinophil-society.org.

Payment Methods

Grants and sponsorships are required in US dollars (USD) and shall be made by either:

1. Check or bank draft
2. Direct wire transfer (free of bank charges) in US dollars
3. Credit Card (fees apply)
