

Allergy Immunology – Clinical Research Faculty

The Division of Allergy & Immunology is seeking high-quality mid to senior level clinicians and investigators to conduct clinical and translational research at the leading pediatric medical center in the country. The physician will:

- Join our well-established and rapidly growing division with a powerful multidisciplinary infrastructure
- Begin innovative clinical trials and/or support one or several of 30 ongoing trials within the division
- Advance the education mission of the division that currently includes teaching and education, and supervision of undergraduate and postgraduate fellows and students in Allergy Immunology
- Ensure that fellows, research assistants, and students are well supported with a strong environment of multi-dimensional mentoring in their academic pursuits
- Have direct access to unique patient populations, patient samples, cohorts and outstanding core research facilities

Qualifications and Experience

- MD/DO or MD/PhD
- Board certified/Board eligible in Allergy & Immunology
- Experience with clinical and research functions, strong leadership, administrative, and/or education
- Mid to senior level clinician in Allergy & Immunology
- High performing researcher who supports innovative clinical care
- Commitment to uphold and enhance principles of diversity, equity, and inclusion in alignment with Cincinnati Children's culture and beliefs

The Division of Allergy & Immunology

- The Mission is to improve the health of children with allergic and immune conditions through innovative research, outstanding clinical care and education of the current and next generation of leaders in healthcare and research
- An internationally recognized leader for the diagnosis and treatment of eosinophil esophagitis, food allergies, drug allergy, asthma, allergy and primary immune-deficiency diseases
- Focus areas of interest: Anaphylaxis, Chronic Allergic Diseases (lung, respiratory, skin and gastrointestinal tract), Drug Allergy, Eosinophilic Diseases Autoimmunity, Epigenetics, Lymphocyte Biology and Mucosal Immunology, Genetics and Genomics
