

IES Medical Journal Review Submission Guidelines

Submit Your Review Online: <https://form.jotform.com/232956980049064>

Target Audience: Scientists and researchers interested in the eosinophil

Review Specifications:

- Submit a short, catchy title of your review including the word 'eosinophils'
- Include a brief introduction followed by a summary of the methods/experimental approach used and major findings of the article
- Highlight any strengths and weaknesses of the study
- Identify remaining knowledge gaps / suggest next research steps that could be taken
- Highlight the significance of this research to the field of eosinophil biology
- References are not required but a maximum of 3 may be embedded within the body of the review, **for example:**
“...previous work found that a sigma factor expressed by B. bronchiseptica called BtrS is essential for the suppression of eosinophils during Bordetella infection in the murine lung (Gestal MC, et al. *Microorganisms*. 2020 Nov 17;8(11):1808.)”
- Avoid unnecessary jargon and acronyms and write for a broad scientific audience (incl. non eosinophil specialists)
- Max word count for body of review: **350 words**
